

# Chesterton 1510 Single Cartridge Seal

*Simple Installation and Increased Reliability Plant-wide in General Duty Applications*

*Groveland, MA – September 12<sup>th</sup>, 2022*

Chesterton, a global leader in equipment sealing and reliability, has released its newest mechanical seal product – The 1510 General Duty Single Cartridge Seal.

Accompanying the recently released 1810/2810 high performance seals, this seal represents another foundational component for Chesterton’s cartridge seal portfolio and future mechanical seal business.

## **Simplicity & Reliability**

The 1510 continues to build on the philosophy of Chesterton. The way we think, design, manufacture, and deliver our products to our users is about value, response time, and quality. Designed with a compact cartridge profile and utilizing the Chesterton T.A.B.S (Tapered Adjustable Bolting System) field proven on the 155 and 442 split seals, the 1510 is designed to fit and install easily on process equipment throughout industry. The unique resettable centering strap allows for impeller adjustments even after the seal has been fitted. Incorporating Chesterton’s 5 key features of good mechanical seal design, the 1510 sets the new standard for general duty cartridge seals.

**About A.W. Chesterton Company**

*Operating in over 100 countries around the world, Chesterton is recognized as a leading provider of knowledge backed solutions and expert service for Rotary, Stationary, and Fluid Power equipment supported by a comprehensive line of industrial fluid sealing solutions, high performance protective coatings, and specialty industrial lubrication.*
